SUMMARY

Frontend Developer with **2+ years of experience** building enterprise logistics and B2B SaaS applications using **React**, **Next.js**, and **TypeScript**. Passionate about building fast, scalable, and user-friendly web applications.

Skilled in building reusable UI components, high-performance data grids, and large dynamic forms, while working closely with cross-functional teams to deliver maintainable software.

Frontend Architecture ▪ Enterprise SaaS ▪ Performance Optimization ▪ Data Visualization ▪ Large-scale Forms

WORK EXPERIENCE

Frontend Developer

APOLLOGIX Co. Ltd. (Logistics & SaaS Solutions)

08/2024 – Present

Ho Chi Minh City, Vietnam

Frontend Engineer developing enterprise logistics and B2B SaaS applications with React, Next.js, and TypeScript for more than 200 internal users.

▪ Apolloxix TMS Container | Enterprise Transport Management System

- Designed a transportation timeline view that displayed daily trips with minute-level accuracy, helping operators track drivers, containers, vehicles, routes, and idle time in one screen.
- Built the timeline using AG Grid features such as pinned columns, custom cell renderers, column groups, column spans, and value getters.
- Developed transport job forms with 50+ dynamic fields using React Hook Form and Yup.
- Implemented AG Grid tables handling more than 15,000 routing records with infinite scrolling, server-side filtering, pagination, and Excel export.
- Managed server state with TanStack Query using caching, query persistence, infinite queries, and mutation invalidation.

▪ Apolloxix FMS | Freight Forwarding & Cost Control Platform

- Developed logistics features used by more than 200 internal users and handling over 15,000 freight charge records.
- Improved page responsiveness by reducing unnecessary re-renders and optimizing data fetching.
- Built shipment and consolidation forms with 70+ fields and complex validation logic.
- Developed editable AG Grid tables for large-scale logistics operations.

▪ Apolloxix Workspace | B2B Multi-Tenant SaaS Platform

- Built the frontend platform from project setup to production using Next.js.
- Implemented multi-tenant authentication, workspace management, and vendor management.
- Configured Docker and GitHub Actions for deployment and release workflows.

SKILLS

Technical Skills

- *Frontend Development:* Build scalable React and Next.js applications for enterprise business systems.
- *UI Engineering:* Develop reusable UI components and responsive user interfaces with Material UI, Tailwind CSS, Shadcn/UI, and Radix UI.
- *Data-intensive Applications:* Build high-performance data grids, timeline views, and dynamic forms using AG Grid, React Hook Form, TanStack Query, Yup, and Axios.
- *Development Tooling:* Proficient with Git, GitHub, Figma, Postman, ESLint, Prettier, and Biome.

Professional Skills

- *Development Methodologies:* Familiar with Agile and Scrum practices.
- *Communication:* Proficient in English for technical communication and documentation (TOEIC: 785, Aug 2022).
- *Team Collaboration:* Experienced working effectively in cross-functional teams.
- *Technical Research:* Skilled at researching technical documentation and learning new technologies.

EDUCATION

Ho Chi Minh City University of Technology (HCMUT)
Bachelor of Computer Engineering

Ho Chi Minh City
Graduated: 2025
